

Measurements Chart for Pants

Please enter your measurements in **INCHES**

Waist

Measure around waist on where you want the pant to sits (normally on the hipbone) When measuring pull the tape so you feel tightness and then slowly loosen it until you feel comfortable. Do not measure on the belt.

Hips

Stand with your feet together. Measure on the widest point of your hip. Allow 1 finger between the tape and the hip. Must empty the pocket before you measure.

Crotch

Measure from the top of your pants waist line pass between your legs to the top of your back waist line. Pull or loosen measure tap to the point where you feel comfortable.

Thigh

Measure around your thigh. Pull it tight and give allowance for slim fit 2.5 inch, 4 inch for the lose fit.

Length

Measure from the top of the waist band down to your below ankle (touch the measurement tap to the ground)

Note: please take off the shoe while measuring the length.

Bottom

Measure the width of your trousers bottom. (a standard pant bottom is normally 16 to 17 inch around. For slim fit pants the width is 14 to 15 inch around.
